PROFESSIONAL OVERVIEW

A highly motivated full-stack developer with a proven track record of designing and implementing robust web applications. Expertise in modern technologies including .NET, React, and SQL Server, coupled with a passion for delivering solutions that drive business value and enhance user experience. Adept at collaborating in agile environments to deliver impactful results.

WORK EXPERIENCE

Full stack developer   *Aunetic, Stockholm | 2024 – present*

Responsible for the development and maintenance of the Blika platform. Key responsibilities include designing, implementing, and testing new features using Vue.js and .NET, as well as modifying and enhancing existing functionality built with Knockout. Contributed to all phases of the software development lifecycle, ensuring high-quality and efficient solutions.

Skills: Vue, C#, Knockout, SQL Server, Entity Framework, Azure

System developer   *Yari Foundation, Stockholm | 2020 – 2025*

Contributed to the development of a portal system using AWS and React to support the Yari Foundation's mission of providing educational opportunities for underprivileged children in Iran. Collaborated with a team of volunteer developers.

Skills: React, Typescript, AWS, Amplify

Web developer   *TÜRNPUU, Uppsala | 2022 – 2024*

Consultant Full-stack Developer providing development services for clients such as Elgiganten, Securitas, and Adlibris. Responsibilities included utilizing a diverse set of tools to implement solutions that met individual client requirements.

Skills: React, JavaScript, Typescript, ASP.NET, EPiServer, Svelte, Next.js, A/B-testing

System developer   *Caspeco, Uppsala | 2019 – 2022*

Full-stack developer focused on the development and maintenance of a booking system, where effective time and resource management were critical. Played a key role in the development of a component library to enhance system efficiency.

Skills: React, Typescript, C#, SQL Server

System developer   *SD Worx (ADITRO), Stockholm | 2017 –2019*

System Developer in the Salary team, with a primary focus on converting a legacy Silverlight system to a modern architecture using Angular, .NET, and SQL Server. This involved overcoming challenges to ensure compatibility with Internet Explorer.

Skills: Angular, C#, SQL Server, Silverlight

Web developer   *Ridebite, Stockholm | 2016 – 2017*

Front-end Developer specializing in the development of a new carpool system.

Skills: React, Redux, JavaScript, Node.js, HTML, CSS
